

Very useful information. This fruit is freely available in Malaysia .
At least read it once to spread the message !

Please read about this miracle fruit that can kill cancer cells 100,000

times, more effective than chemo that gave you side effects.

Guyabano,... The SourSop Fruit

The SourSop or the fruit from the Graviola tree is a miraculous natural cancer cell killer
10,000 times stronger than Chemo.
Why are we not aware of this?

Its because some big corporation want to make back their money spent on years of
research by trying to make a synthetic version of it for sale.

So, since you know it now you can help a friend in need by letting him know or just drink
some soursop juice yourself as prevention from time to time.

The taste is not bad after all. It's completely natural and definitely has no side effects.

If you have the space, plant one in your garden.
The other parts of the tree are also useful.

The Next Time You Have A Fruit Juice, Ask For A SourSop.

How many people died in vain while this billion-dollar drug maker concealed the secret
of the miraculous Graviola tree?

This tree is low and is called Graviola in Brazil , Guanabana in Spanish and has the
uninspiring name "Soursop" in English.

The fruit is very large and the subacid sweet white pulp is eaten out of hand or, more
commonly, used to make fruit drinks, sherbets and such.

The principal interest in this plant is because of its strong anti-cancer effects.

Although it is effective for a number of medical conditions, it is its anti tumor effect that
is of most interest.

This plant is a proven cancer remedy for cancers of all types.

Besides being a cancer remedy, graviola is a broad spectrum antimicrobial agent for both bacterial and fungal infections, is effective against internal parasites and worms, lowers high blood pressure and is used for depression, stress and nervous disorders.

If there ever was a single example that makes it dramatically clear why the existence of Health Sciences Institute is so vital to Americans like you, it's the incredible story behind the Graviola tree.

The truth is stunningly simple:

Deep within the Amazon Rainforest grows a tree that could literally revolutionize what you, your doctor, and the rest of the world thinks about cancer treatment and chances of survival.

The Future Has Never Looked More Promising.

Research shows that with extracts from this miraculous tree it now may be possible to:

- * Attack cancer safely and effectively with an all-natural therapy that does not cause extreme nausea, weight loss and hair loss
- * Protect your immune system and avoid deadly infections
- * Feel stronger and healthier throughout the course of the treatment
- * Boost your energy and improve your outlook on life

The source of this information is just as stunning: It comes from one of America's largest drug manufacturers, the fruit of over 20 laboratory tests conducted since the 1970's!

What those tests revealed was nothing short of mind numbing...

Extracts from the tree were shown to:

- * Effectively target and kill malignant cells in 12 types of cancer, including Colon, Breast, Prostate, Lung and Pancreatic cancer..
- * The tree compounds proved to be up to 10,000 times stronger in slowing the growth of cancer cells than Adriamycin, a commonly used chemotherapeutic drug!
- * What's more, unlike chemotherapy, the compound extracted from the Graviola tree selectively hunts down and kills only cancer cells.

It Does Not Harm Healthy Cells!

The amazing anti-cancer properties of the Graviola tree have been extensively researched-- so why haven't you heard anything about it?

If Graviola extract is as half as promising as it appears to be--

why doesn't every single Oncologist at every major hospital insist on using it on all his or her patients?

The spine-chilling answer illustrates just how easily our health--

and for many, our very lives are controlled by money and power.

Graviola- -the plant that worked too well

One of America 's biggest billion-dollar drug makers began a search for a cancer cure and their research centered on Graviola, a legendary healing tree from the Amazon Rainforest.

Various parts of the Graviola tree--including the bark, leaves, roots, fruit and fruit-seeds--have been used for centuries by medicine men and native Indians in South America to treat heart disease, asthma, liver problems and arthritis.

Going on very little documented scientific evidence, the company poured money and resources into testing the tree's anti-cancerous properties-- and were shocked by the results. Graviola proved itself to be a cancer-killing dynamo.

But that's where the Graviola story nearly ended.

The company had one huge problem with the Graviola tree--it's completely natural, and so, under federal law, not patentable. There's no way to make serious profits from it.

It turns out the drug company invested nearly seven years trying to synthesize two of the Graviola tree's most powerful anti-cancer ingredients.

If they could isolate and produce man-made clones of what makes the Graviola so potent, they'd be able to patent it and make their money back.

Alas, they hit a brick wall. The original simply could not be replicated.

There was no way the company could protect its profits--or even make back the millions it poured into research.

As the dream of huge profits evaporated, their testing on Graviola came to a screeching halt.

Even worse, the company shelved the entire project and chose not to publish the findings of its research!

Luckily, however, there was one scientist from the Graviola research team

whose conscience wouldn't let him see such atrocity committed.

Risking his career, he contacted a company that's dedicated to harvesting medical plants from the Amazon Rainforest and blew the whistle.

Miracle Unleashed

When researchers at the Health Sciences Institute were alerted to the news of Graviola, they began tracking the research done on the cancer-killing tree.

Evidence of the astounding effectiveness of Graviola--and its shocking cover-up--came in fast and furious.....

...The National Cancer Institute performed the first scientific research in 1976.

The results showed that Graviola's "leaves and stems were found effective in attacking and destroying malignant cells." Inexplicably, the results were published in an internal report and never released to the public...

Since 1976, Graviola has proven to be an immensely potent cancer killer in 20 independent laboratory tests, yet no double-blind clinical trials- the typical benchmark mainstream doctors and journals use to judge a treatment's value- were ever initiated..

A study published in the Journal of Natural Products, following a recent study conducted at Catholic University of South Korea stated that one chemical in Graviola was found to selectively kill colon cancer cells at "10,000 times the potency of (the commonly used chemotherapy drug) Adriamycin.. ."

....The most significant part of the Catholic University of South Korea report is that Graviola was shown to selectively target the cancer cells, leaving healthy cells untouched.

Unlike chemotherapy, which indiscriminately targets all actively reproducing cells (such as stomach and hair cells), causing the often devastating side effects of nausea and hair loss in cancer patients.

...A study at Purdue University recently found that leaves from the Graviola tree killed cancer cells among six human cell lines and were especially effective against prostate, pancreatic and lung cancers...

Seven Years Of Silence Broken--it's Finally Here!

A limited supply of Graviola extract, grown and harvested by indigenous people in Brazil , is finally available in America .

The full Graviola Story--including where you can get it and how to use it--is included in Beyond Chemotherapy:

New Cancer Killers, Safe As Mother's Milk,

a Health Sciences Institute FREE special bonus report on natural substances

that will effectively revolutionize the fight against cancer.

>From breakthrough cancer and heart research and revolutionary Amazon Rainforest herbology to world-leading anti-aging research and nutritional medicine, every monthly Health Sciences Institute Member's Alert puts in your hands today cures the rest of America --including your own doctor-is likely to find out only ten years from now.

For your information.....

AFTER YEARS OF TELLING PEOPLE CHEMOTHERAPY IS THE ONLY WAY TO TRY AND ELIMINATE CANCER, JOHNS HOPKINS IS FINALLY STARTING TO TELL YOU THERE IS AN ALTERNATIVE WAY

Cancer Update from Johns Hopkins

1. Every person has cancer cells in the body. These cancer cells do not show up in the standard tests until they have multiplied to a few billion. When doctors tell cancer patients that there are no more cancer cells in their bodies after treatment, it just means the tests are unable to detect the cancer cells because they have not reached the detectable size.
2. Cancer cells occur between 6 to more than 10 times in a person's lifetime.
3. When the person's immune system is strong the cancer cells will be destroyed and prevented from multiplying and forming tumors.

4. When a person has cancer it indicates the person has multiple nutritional deficiencies. These could be due to genetic, environmental, food and lifestyle factors.
5. To overcome the multiple nutritional deficiencies, changing diet and including supplements will strengthen the immune system.
6. Chemotherapy involves poisoning the rapidly-growing cancer cells and also destroys rapidly-growing healthy cells in the bone marrow, gastro-intestinal tract etc., and can cause organ damage, like liver, kidneys, heart, lungs etc.
7. Radiation while destroying cancer cells also burns, scars and damages healthy cells, tissues and organs.
8. Initial treatment with chemotherapy and radiation will often reduce tumor size. However prolonged use of chemotherapy and radiation do not result in more tumor destruction.
9. When the body has too much toxic burden from chemotherapy and radiation the immune system is either compromised or destroyed, hence the person can succumb to various kinds of infections and complications.
10. Chemotherapy and radiation can cause cancer cells to mutate and become resistant and difficult to destroy. Surgery can also cause cancer cells to spread to other sites.
11. An effective way to battle cancer is to starve the cancer cells by not feeding it with the foods it needs to multiply.

WHAT CANCER CELLS FEED ON:

- a. Sugar is a cancer-feeder. By cutting off sugar it cuts off one important food supply to the cancer cells.. Sugar substitutes like NutraSweet, Equal, Spoonful, etc are made with Aspartame and it is harmful. A better natural substitute would be Manuka honey or molasses but only in very small amounts. Table salt has a chemical added to make it white in colour. Better alternative is Bragg's aminos or sea salt.
- b Milk causes the body to produce mucus, especially in the gastro-intestinal tract. Cancer feeds on mucus. By cutting off milk and substituting with unsweetened soy milk, cancer cells are being starved.
- c. Cancer cells thrive in an acid environment. A meat-based diet is acidic and it is best to eat fish, and a little chicken rather than beef or pork. Meat also contains livestock

antibiotics, growth hormones and parasites, which are all harmful, especially to people with cancer.

d. A diet made of 80% fresh vegetables and juice, whole grains, seeds, nuts and a little fruits help put the body into an alkaline environment About 20% can be from cooked food including beans. Fresh vegetable juices provide live enzymes that are easily absorbed and reach down to cellular levels within 15 minutes to nourish and enhance growth of healthy cells.

To obtain live enzymes for building healthy cells try and drink fresh vegetable juice (most vegetables including bean sprouts) and eat some raw vegetables 2 or 3 times a day. Enzymes are destroyed at temperatures of 104 degrees F (40 degrees C).

e. Avoid coffee, tea, and chocolate, which have high caffeine. Green tea is a better alternative and has cancer-fighting properties. Water--best to drink purified water, or filtered, to avoid known toxins and heavy metals in tap water. Distilled water is acidic, avoid it.

12. Meat protein is difficult to digest and requires a lot of digestive enzymes. Undigested meat remaining in the intestines become putrified and leads to more toxic buildup.

13. Cancer cell walls have a tough protein covering. By refraining from or eating less meat it frees more enzymes to attack the protein walls of cancer cells and allows the body's killer cells to destroy the cancer cells.

14. Some supplements build up the immune system (IP6, Flor-ssence, Essiac, anti-oxidants, vitamins, minerals, EFAs etc..) to enable the body's own killer cells to destroy cancer cells. Other supplements like vitamin E are known to cause apoptosis, or programmed cell death, the body's normal method of disposing of damaged, unwanted, or unneeded cells.

15. Cancer is a disease of the mind, body, and spirit. A proactive and positive spirit will help the cancer warrior be a survivor.

Anger, unforgiveness and bitterness put the body into a stressful and acidic environment. Learn to have a loving and forgiving spirit.. Learn to relax and enjoy life.

16. Cancer cells cannot thrive in an oxygenated environment. Exercising daily, and deep breathing help to get more oxygen down to the cellular level. Oxygen therapy is another means employed to destroy cancer cells.

(PLEASE FORWARD IT TO PEOPLE YOU CARE ABOUT)
